

Corn Cob Grit

Corn Cob Grit is an extremely soft, organic granulate from crushed, cleaned and sifted corn cobs.

Applications

- Reusable abrasive
- Cleaning without the base material losing substance
- Deburring
- Drying medium

Blasting systems

- Pressure blast systems
- Injection blast cabinets

Typical physical properties

Hardness	approx. 4,5 mohs
Grain shape	angular
Ignition temperature	approx. 170 °C
Specific gravity	approx. 0,9 g/cm ³
Bulk density <small>depending on granular size</small>	approx. 0,7 g/cm ³

Typical chemical analysis

non-ferrous

Packaging

20 / 25 kg bags on a pallet

Available sizes

Metric	Average size range (µm)
	200 – 400
	400 – 800
	500 – 1180
	750 – 1600
	800 – 1800
	1250 – 1800
	1800 – 2000
	1800 – 2800
	2000 – 3500
	2800 – 3800
	3150 – 4500
	3800 – 5000

Other grain sizes can be produced if required.
